Content to Left:

Heading: 6 Series of Beauty & Flexibility

For storefront glazing systems that offer versatility, high performance and excellent energy efficiency, shop at PRL of Los Angeles County. Offering six series of center and offset glazed systems, our framing options can accommodate a wide array of glass and aluminum storefront designs. Manufactured for exterior and interior commercial, industrial and residential applications, you can count on our storefront glazing series.

Just like any good tradesperson needs the right tools for the job, so do contractors, specifiers and installers. That's why our center and offset glazed systems offer design flexibility. Manufactured to be compatible with a large assortment of our entrance doors, glass types, hardware and handles, these storefront framing components can meet virtually any architectural specification.

Content to Right:

Heading: Spectacular Glass Selection for Spectacular Storefronts

Featuring traditional center set and front set glass, PRL's glazing systems can accommodate a host of glass types and thicknesses for glass and aluminum storefronts. With the ability to be fitted with insulated and laminated glass, our storefront series can provide increased energy efficiency and top performance. Excellent for managing indoor temperatures, air and water infiltration and meeting requirements for structural wind loads, seismic designs and hurricane impact resistance, our center and offset glazed systems have a lot to offer.

Manufactured in-house from 6063-T5 aluminum alloy, each glazing system includes a complete line of storefront stock lengths to accommodate most job conditions. Available in your choice of two popular architectural finishes, our framing sections provide durability while coordinating beautifully with a host of PRL's entry door hardware.

CENTER GLAZING SYSTEMS
