

PAGE TITLE: E-Lever Smart Locks. Keyless Entries for All-Glass, Aluminum & Sliding Doors

#### INTRO SECTION:

Shop E-Lever Smart locks at PRL! Safer than typical locks, this keyless entry boasts enhanced security with real-time monitoring, smart home system integration, and more! We carry these digital locks for our frameless all-glass doors and can order them for our aluminum doors and interior sliders upon request.

Integrating cutting-edge technology with intelligent door hardware, E-Lever Smart locks also deliver convenient access control. Storing up to 100 fingerprints, 300 passwords and 75 card codes, you can easily manage your settings in the app via Bluetooth®.

E-Lever Smart locks add an extra layer of protection for endless commercial and residential doors. Available in various black and silver finishes, these electronic locks look stunning in offices, homes and hotels. Help keep family members, employees and guests safe! Quote these keyless entries for your next project. You can get E-Lever Smart locks for many all-glass, aluminum and sliding door thicknesses.

#### SECTION 1 HEADING: E-Lever Smart Locks for All-Glass Doors

We stock E-Lever Smart locks for [frameless all-glass doors](#) on a regular basis. Made for interior applications only, this keyless entry's unlocking options include 100 fingerprints, 78 passwords, 75 card codes, the app, and 2 mechanical keys for emergencies.

E-Lever Smart locks are designed as lever lock door handles. Using a fingerprint or password on the outside display, it will unlock all-glass doors in 2 seconds. You can also swipe a card at the sensor area or use the app via Bluetooth®. Then, you can either close the door manually, or with self-closing hardware. And because the inside E-Lever Smart lock always allows free exits, you just push down on the handle to leave an area.

You can purchase these digital door locks in popular architectural finishes. Lock housing covers are offered in matte black as well as brushed and polished stainless steel, and you can specify electronic lever handles in brushed nickel and black.

Equipped with a bunch of valuable features, it's easy to see why E-Lever Smart locks are the right choice. You can manage all settings in the app, recharge with its handy USB port, set auto-lock time settings to your liking- and E-Lever Smart locks even allow reversible installation for left and right handed users!

#### SECTION 2 HEADING: Batteries, Alternate Power & Remote Control Option

E-Lever Smart locks are battery powered. Located inside the interior lever handle for security purposes, you can unlock doors with a key or external power bank and USB port when the battery is drained. It's simple. Just insert and twist the key or connect the USB cord to the port on the outside of the electronic lock's lever.

And, if you'd like to monitor your E-Lever Smart lock's battery power, you can buy a Smart Gateway Wi-Fi remote control. Sold separately, it not only monitors battery life, but gives you unlimited Bluetooth® operation range, Amazon Alexa and Google Assistant voice control options, and real-time activity logs. Contact PRL for availability. Gateway remotes may only be offered elsewhere.

#### SECTION 3 HEADING: E-Lever Smart Locks for Aluminum & Sliding Doors

We can order E-Lever Smart locks for our aluminum doors and E-Handle Smart locks for our interior sliders upon request. Accommodating multiple ingress door thicknesses, these keyless entries will meet your field conditions and entrance proposal needs.

E-Lever Smart locks for [aluminum doors](#) are designed as lever lock handles. Produced for indoor and outdoor environments, they're ideal for shaded areas protected from rain, direct sunlight or other harsh conditions. There are 2 models available- the ELH1 and ELH5. Please contact us regarding which digital lock we can order for you.

The ELH1's unlocking options include fingerprint, password, app and key, and you can request this E-Lever Smart lock in bright chrome and matte black finishes. The ELH5's unlocking options also includes card codes, and this electronic lock is crafted in black anodized and silver finishes that coordinate beautifully with our aluminum doors.

You can get E-Handle Smart locks for a number of our [interior sliding doors](#). Designed as flush finger pulls, their locking options include fingerprint, Wi-Fi, app and key. Also rendered in black anodized and silver finishes, these keyless entries not only secure many of our [sliders](#), but they can be used on interior sliding windows too!
